

A range of Bathroom and Shower accessories designed for use by the young and elderly and by those with limited mobility.

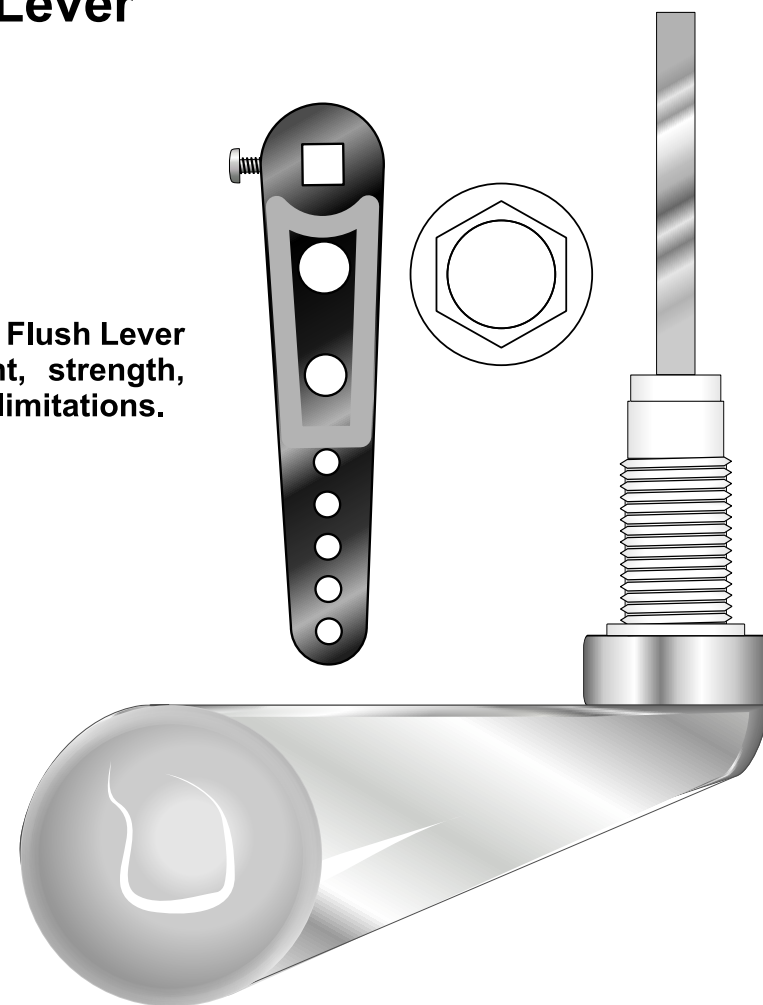

Easi Flush Cistern Lever

A practical and easy to use extended WC Flush Lever for use by those with restricted sight, strength, coordination or having mobility/dexterity limitations.

Features

- Ergonomic design
- Can be operated with an elbow
- Easy to see
- Easy to touch
- Easy to push
- If installed rotated through 90° so that it is upright, it can be easily pushed/pulled with a sideways movement

An ideal replacement to a standard cistern lever. No tools are required to install. The lever is connected to the Plastic Lift Arm which is in turn connected to the Metal Link on the Siphon. To install, unscrew the screw on the existing Lift Arm and push it off the square section of the lever. Then detach it from the C Link. Remove the existing Lever and remove the back nut holding it in place. Install the new lever by repeating these steps in the opposite way.
